VIGIER GUITARS HIT THE BLUES CIRCUIT

Orange, Ca (April 19, 2002) – LA Music Award Blues phenomena Walter Trout could play any model guitar but decided on the Vigier Expert. With a reputation for rippin' licks alongside the greatest names in Blues including John Lee Hooker, Big Mama Thornton, John Mayall & the Bluesbreakers and Canned Heat the Vigier Expert Series guitar provides extreme value to his European and US tour.

With *Trout's* on stage ability and his Vigier guitar, he keeps the art of blues thriving and vivacious. "My Vigier Expert guitar plays great and sounds awesome. It has an especially full and clear tone down on the lower strings. A lot of guitars tend to get muddy in that area, but not my Vigier. The sustain is incredible but not at the expense of the clarity of tone. It stays in tune very well through all my crazed bending of strings. It plays with lots of ease and a minimum of effort. It's an awesome guitar," says, *Trout*. Beyond any doubt, Vigier's scorching guitar sound enhances the boundaries of one of music's oldest forms.

With strong endorsement the Vigier Expert, series leans strongly on the classic double cutaway design and with masterful construction possesses one of the most comfortable necks created, options either Vintage 54 single coils, Vintage 63's, or Texas Blues pickups and boasts a flawless finish. More importantly, they sound great and are quick to become your favorite axe.

Salwender international is proud to be the exclusive US importer and distributors for Vigier guitars and basses. To find out more contact Salwender International ask for a Vigier retailer near you.
